

BlackPearl

Software-Defined Platform for Tiered Object and File Storage

Spectra Logic is at the forefront of data preservation, protection, and optimization.

BlackPearl® extends this legacy by delivering a robust, software-defined storage platform that seamlessly integrates with flash, disk, tape, and cloud—enabling organizations to secure and preserve their critical data at scale.

BlackPearl Nearline Object Gateway

- Integrates with Amazon S3-compatible applications
- Optimized for large, unstructured datasets
- Policy-based data movement
- Seamless replication and data redundancy

BlackPearl Network File Gateway

- Scalable to 20PB of raw storage in a single rack
- Data preservation and immutability
- Cost-effective storage (NFS, CIFS/SMB)

BlackPearl Nearline Media Gateway

- Optimized for tape storage
- Advanced policy control
- Robust data protection for enhanced resilience
- Designed for tailored workflows

Object-Based Tape

- Compatible with Amazon S3-Glacier
- Fast retrieval of infrequently accessed data
- Deep archive tier for long-term data retention
- Scales to exabytes of storage

BlackPearl: Flexible, Resilient, and Future-Ready

The BlackPearl family provides scalable, policy-driven storage solutions with all-flash and hybrid disk/flash configurations. Designed for high availability, reliability, and cost-effective scalability, BlackPearl ensures seamless data access and control whether on-premises, in the cloud, or across a multi-cloud hybrid environment.

BlackPearl provides a future-ready storage foundation, optimizing data security, accessibility, and management for active archives, deep storage, and hybrid cloud workflows.

About Spectra Logic Corporation

Spectra Logic modernizes IT infrastructures to preserve, protect and defend data, from days to decades, whether on-premises, in a single cloud, across multiple clouds or in all locations at once. Our cost-effective solutions help organizations efficiently manage, migrate and store long-term data, from terabytes to exabytes, with features that make it ransomware resilient.
