

# BlackPearl Nearline Object Gateway

## Hybrid cloud storage extended to tape

Spectra Logic BlackPearl® Nearline Object Gateway provides more than ordinary object storage platforms. It's a versatile solution that creates tiers of on-premises, object-based flash, disk, and tape, extending to the cloud to deliver an ideal blend of performance, cost-effectiveness, and scalability for all your secondary storage workloads.

### Cloud Integration

- Compatible with Amazon S3 & Amazon S3 Glacier
- Policy-based data movement across on-prem and cloud
- Optimized for storing large, unstructured datasets

### Protection

- Multi-factor authentication
- Object Lock immutability
- Encryption in-flight and at-rest
- Physical air-gap when extended to tape

### Flexibility

- Configurable flash and disk architecture that seamlessly extends to tape
- Object-based disk scales up to 20 petabytes (PB) of raw storage in a single rack

### Multiple Use Cases

- Backup
- Disaster Recovery
- Active & Long-Term Archive
- Media & Entertainment Content Archival

## BlackPearl Nearline Object Gateway Difference

BlackPearl Nearline Object Gateway offers the long-term retention functionality of cloud cold storage with the benefits of on-premises performance.

Object-based disk provides instant retrieval of near-term data, while a native interface to object-based tape provides a deep archive tier of storage for exabytes of secondary data retention.

# Lower the cost of Object Storage

## Bring the high cost of cloud storage down to earth

---

### Benefits of BlackPearl Nearline Object Gateway

#### Amazon S3-Compatible Storage

Configure your storage to match your needs with Amazon S3 Infrequent Access & Amazon Glacier storage tiers, providing cost-efficient flexibility.

#### Cost-Effective Data Management

Optimize budgets by storing large, unstructured datasets at a fraction of the cost compared to public cloud storage, ensuring data is both secure and affordable.

#### Data Immutability

Maximize your security posture with multi-factor authentication and Object Lock (WORM), ensuring your data remains impervious to unauthorized modification or deletion, offering robust ransomware resiliency.

#### Data Control & Compliance

Gain control over your data, allowing you to secure, maintain, and manage sensitive information or proprietary data within your physical infrastructure.

#### Complete Data Security

Encryption at rest and in-flight, ensuring that sensitive information is safe from unauthorized access, providing peace of mind for your business and customers.

#### Seamless Data Redundancy

Ensure data access and availability with seamless redundancy via policy-based local and multi-site replication, enhancing disaster recovery capabilities and minimizing downtime in case of local disruptions.

#### On-Prem Performance with Massive Scalability

Realize future-proof storage by combining on-premises performance with affordable, efficient scale-up expansion to petabytes of disk and exabytes of tape.

#### Flexible, Optimized Deployment Options

Spectra Logic offers the BlackPearl in 2U and 4U models, along with hardware options and multiple expansion chassis, to meet various performance and capacity needs.

The BlackPearl product family enables the most optimized, efficient placement of data with All-flash and Hybrid disk/flash configurations.

Maintain full access and control over your data, with an enhanced Active-Standby availability architecture that minimizes downtime and maximizes reliability.

## About Spectra Logic Corporation

Spectra Logic modernizes IT infrastructures to preserve, protect and defend data, from days to decades, whether on-premises, in a single cloud, across multiple clouds or in all locations at once. Our cost-effective solutions help organizations efficiently manage, migrate and store long-term data, from terabytes to exabytes, with features that make it ransomware resilient.
