# Simply Affordable Video Storage:

Digital Storage Solutions for Media and Entertainment

As broadcasters and entertainment organizations produce high-definition programming and digital content, the need for efficient, file-based workflow is essential to be competitive. A key aspect of this transition is the ability to capably manage and protect your digital content. Management of your digital storage means that you have a cost-effective and reliable solution that allows for quick access to your audio and video files when you need them. Easy to use and designed for maximum efficiency, Spectra digital storage solutions offer industry-leading density and can expand to meet your current and future needs.

### • Easy-to-Use

Highly intuitive, Spectra libraries work with all major broadcast media and asset management, HSM, and data protection software and systems.

• Easy-to-Maintain

Offers customer replaceable units-most components are hot-pluggable and simply slide in.

Scalable

Spectra storage easily scales from hundreds of hours to millions of hours of content.

### Reliable Access

Spectra tape libraries are highly reliable due to extensive component redundancy and self monitoring.

- **Complete Lifecycle Management** Fully protects all of your archived assets by monitoring tape media, drives and library hardware.
- Energy Efficiency

Spectra's tape solutions are power-efficient and give you tools to monitor how much energy your storage consumes.

SPECTRA LOGIC.COM

Anthony Tassarotti CTO of WMHT Trov. New York

V1-120121

Our Spectra T120 was a workhorse, but our growth demanded a larger library with more

storage space. When we decided to move to a

larger storage library, there was never any question about staying with Spectra Logic—we seriously never looked at any other system. **99**
