

Spectra BlackPearl® Platform Overview

BlackPearl is a multi-purpose hybrid storage platform that easily and cost effectively scales up as object and file volumes grow; adapts as operational requirements change; and enables easy synchronization of data between on-prem and cloud storage.

A flexible solution that can grow

A solution that grows as data increases and is flexible as use cases evolve

- Scale-up architecture
- Combines disk and flash for high performance
- NFS, SMB, S3, Spectra DS3 or on-prem glacier*

Able to store large volumes of data

Storage of large volumes of data across on-prem and/or cloud

- Seamless support for on-prem glacier* storage
- Failover of production data to the public cloud for disaster recovery
- Bi-directional data synchronization for automatic replication of on-prem and cloud data
- Apply cloud service and on-prem processing regardless of data location

Built-in cost savings now and in the future

A cost-effective storage solution initially and long-term

- Scale-up NAS architecture allows for multiple petabytes of disk/tape at lowest cost
- Very high density with spin-down disk capabilities for cost and power efficiency
- Data compression prior to encryption for efficiency and security
- Simplified access to tape to store petabytes of data cost effectively

Protecting your data from cyber attack

Smarter way to protect data from external cyberattacks and insider threats

- Virtual air gap protection through immutable snapshots and multi-factor authentication
- Physical air gap to automated tape
- Ability to seamlessly replicate data offsite or to public cloud for disaster recovery
- Optional failover of control module
- Enterprise-grade self-encrypted SAS tape drives
- Object locking**

BlackPearl Platform features at a glance

BlackPearl Platform Specifications

	BlackPearl V Series			BlackPearl S Series			BlackPearl X Series			BlackPearl Expansion
Interface	CPU With Motherboard	Tape Connect	Network	CPU With Motherboard	Tape Connect	Network	CPU With Motherboard	Tape Connect	Network	Dual Power Supplies
		Single	Up to 3 FC or SAS HBA	25 GbE Standard, 40GbE optional	Single	Up to 3 FC or SASHBA	25 GbE Standard, 40GbE optional	Single or Dual	Up to 2x8 or 16 port FC or SAS HBA	100GbE Standard
Internal Disk Drives	24 x 3.5" SAS HDD's			60 x 3.5" SAS HDDs						107 x 3.5" SAS HDDs
Flash Drives	(Upgrade) 6 x 6.4 TB NVMe SSD's			(Upgrade) 10 x 6.4 TB NVMe SSDs			24 x 6.4 TB NVMe SSDs			None
Throughput	Up to 1.6 GB/s to tape sustained			Up to 4 GB/s to tape sustained			Up to 9 GB/s to tape sustained			
Expansion	Up to 10 expansion chassis***			Up to 9 expansion chassis***			Up to 10 expansion chassis***			
Capacity of expansion	107 drive expansion chassis			107 drive expansion chassis			107 drive expansion chassis			Up to 107 drives per 4U chassis

About Spectra Logic Corporation

Spectra Logic develops a full range of Attack Hardened™ data management and data storage solutions for a multi-cloud world. Dedicated solely to data storage innovation for more than 40 years, Spectra Logic helps organizations modernize their IT infrastructures and protect and preserve their data with a broad portfolio of solutions that enable them to manage, migrate, store and preserve business data long-term, along with features to make them ransomware resilient, whether on-premises, in a single cloud, across multiple clouds, or in all locations at once. To learn more, visit www.spectrallogic.com.
