# MediaPanel Software for Avid Media Composer

## Streamlined Media Management and Archiving

MediaPanel software, part of the Rio Media Suite, is a modular content management and archiving solution that integrates with Avid® Media Composer®. It streamlines workflows by enabling users to search, archive, and access both Avid and non-Avid content directly within the Media Composer interface.

### Find & Discover Content Easily

- Filter by multiple metadata types for comprehensive search results
- Find existing content directly from the MediaPanel interface
- Discover new content to improve user work quality

### Preview Content Quickly

- Preview content before restoring or importing it into Media Composer
- Automatically generate thumbnails and proxies for faster asset identification

### Import Media Seamlessly

- Import Avid and non-Avid media from storage or archive repositories
- Simultaneously select import bins for single assets or multiple selections

### Archive Assets & Bins Effortlessly

- Drag-and-drop Avid asset archiving in native format
- Versioned compositions with project awareness
- Archive bins for easy backup and sharing

### Flexible Deployment Models

Organizations can choose how to purchase and deploy MediaPanel software for Avid Media Composer to meet their video editing needs.

- Deploy MediaPanel on-premises, in the cloud, or a hybrid environment
- Choose between subscription or software-as-a-service (SaaS) licensing
- Aggregate and manage flash, disk, tape, and cloud storage for flexible archive workflows

# MediaPanel Software for Avid Media Composer

MediaPanel software for Avid Media Composer is a powerful and intuitive tool for managing content and collaboration within Avid video editing suites.

## Simple & Friendly User Interface

MediaPanel software is a user-friendly interface within Avid Media Composer or streamlined archiving, importing, and collaboration for media managers to:

- Easily organize, view, and locate content beyond Media Composer
- Access media directly through the integrated panel

## Instant Preview & Selective Import

With embedded proxy creation of Avid and non-Avid assets, users can:

- Identify assets in the search results by thumbnails and the asset version
- Preview a proxy version of the asset, select the desired scenes based on the markers already created in Avid, and import the content into Media Composer

## Find the Right Content Easily

MediaPanel software has comprehensive search capabilities that enable users to:

- Search for content directly from Media Composer
- Filter based on multiple types of metadata in a single interface

## Restore Assets & Bins

The MediaPanel software enhances workflow efficiency and project management by supporting:

- Restore Avid assets, including compositions, to the default or a selected bin
- Replicate or restore bins along with all associated elements

# MediaPanel Software for Avid Media Composer

## Archive Avid Assets & Bins Effortlessly

- Archive Avid assets include master clips, sub-clips, sequences, and bins, with their original projects and bins.
- Capture and index full bin and asset metadata, including Avid Markers, for easy content searchability.
- MediaPanel software is a multi-version repository, archiving missing elements as compositions are modified.
- Archive Avid bins independently or with the media they contain, storing them across multi-tier storage as needed.

## Storage Agnostic

- Aggregate and manage multiple storage types, moving content to the appropriate storage tier based on preferences, project requirements, or bin structure.
- Archive media in its native format to reduce storage costs.
- Eliminate duplicate files to optimize storage use and improve reliability.

## Efficient & Scalable Performance

- Built on a cloud-native architecture, MediaPanel automatically scales resources to manage workloads and ensure availability.
- Uses distributed, self-healing processes to maintain uptime and complete workflows without interruption.
- Supports anywhere from a few users to hundreds while delivering consistent, enterprise-level performance.

## About Spectra Logic Corporation

Spectra Logic modernizes IT infrastructures to preserve, protect and defend data, from days to decades, whether on-premises, in a single cloud, across multiple clouds or in all locations at once. Our cost-effective solutions help organizations efficiently manage, migrate and store long-term data, from terabytes to exabytes, with features that make it ransomware resilient.
