

Better backups using Veritas Netbackup™ and Backup Exec™ combined with Spectra storage solutions

Spectra Logic storage solutions and Veritas Netbackup and Backup Exec provide a powerful, flexible and easy-to-use backup and recovery solution designed to protect valuable data. Together, the two solutions enable users to reduce time, resources and backup windows – while preserving their business continuity.

Veritas™ Netbackup and Backup Exec

Netbackup and Backup Exec provides backup and recovery that is built for change and provides the flexibility to protect your entire environment while also delivering agile recovery.

With Netbackup and Backup Exec you can meet critical backup windows, exceed recovery expectations, optimize your existing storage and eliminate outdated and siloed backup and recovery complexity. The solutions intelligently index and catalog backup data using a single stream for a single backup, so you don't waste valuable time and disk space mounting backup jobs, determining what's inside and searching for specific data.

Highlights

- **Reduces cost and complexity:** a single solution for your entire infrastructure
- **Minimizes backup window:** advanced data deduplication decreases network traffic and reduces disk space required for storing backup data.
- **Protects with ease:** create standby virtual copies of your physical systems for disaster recovery in minutes.

Spectra Logic Storage Solutions

Spectra Logic storage solutions solve the problem of digital preservation for business and technology professionals dealing with exponential data growth. As part of the Veritas Backup Exec and Netbackup solution, Spectra enables multi-decade data storage and access by creating new methods of managing information in all forms of deep storage for the enterprise – including backup and archive.

Spectra assures that the hardware platform provides simplified management, better reliability and intelligent scaling for Veritas Netbackup and Backup Exec.

Highlights

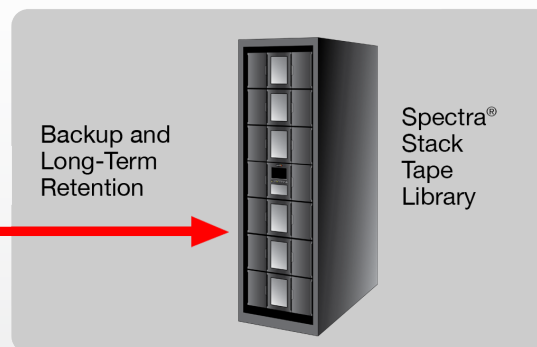

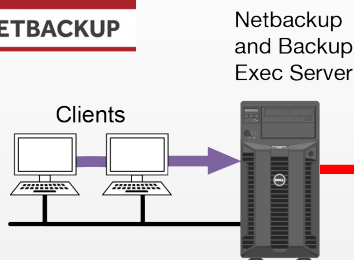

- **Cost:** tape as low as 2¢/GB (online) & .5¢/GB (offline).
- **Performance:** scale to 144 tape drives with throughput at 207.4TB/hr native, 466.6TB/hr compressed.
- **Scalability:** Over 2 exabytes of capacity in a single Spectra TFinity® Tape Library.

*Compression 2.5:1

Veritas Backup Exec™

VERITAS
NETBACKUP

Benefits Summary

- Provides powerful, comprehensive backups
- Shrinks overall backup windows
- Reduces costs and complexities
- Delivers flexible, easy-to-use data protection
- Preserves data indefinitely
