

Spectra Storage Solution Bundles Featuring Spectra StorCycle®

Designed to simplify storage, Spectra Solution Bundles were created to identify and offload inactive data from primary storage. They are completely customizable to suit any environment and their business-specific data continuity needs.

- ▶ **Object storage**
- ▶ **File storage**
- ▶ **Data protection & availability**

File-Based Disk	Components	Solution Features
<p>Bundle includes data management software, creating a file storage environment. Solution consists of two copies of data, on two separate disk systems that can be located in the same location, or in geographically separate locations.</p>	  	<ul style="list-style-type: none"> Open, non-proprietary Fast and transparent access HTML <i>and</i> symbolic link support Tapeless environment (disk only)

Hybrid Cloud	Components	Solution Features
<p>Bundle includes data management software, creating an object storage environment. Solution consists of disk, tape and public cloud for a hybrid cloud solution.</p>	   	<ul style="list-style-type: none"> Open, non-proprietary Genetic diversity, geographic separation of data Mix of on-premise and public cloud Highly scalable Control and reduce cloud costs

Private Cloud	Components	Solution Features
<p>Bundle includes data management software, creating an object storage environment. Solution consists of disk and tape for an on-premise, private cloud solution.</p>	  	<ul style="list-style-type: none"> Open, non-proprietary Genetic diversity, data protection Highly compliant Highly reliable High performance, fast recall

Component Key	 Public Cloud	 Object Tape	 Object Disk	 StorCycle Storage Lifecycle Management	 NAS
---------------	--	---	---	---	---

Disaster Recovery	Components	Bundle Features
Bundle includes data management software, creating an object storage environment. Solution consists of tape and ejectable tape copy for offsite protection, and the option to utilize the public cloud.	   	<ul style="list-style-type: none"> • Open, non-proprietary solution • Provides air gap data protection • Accommodates offsite, offline copies of data • Multiple copies for data protection • Long term, affordable storage solution • HTML link support

Bring Your Own Storage	Components	Solution Features
Bundle includes data management software, creating a file or object storage environment. Solution allows users to bring their own storage targets (non-Spectra NAS and public cloud) to leverage existing hardware and public cloud.	   	<ul style="list-style-type: none"> • Open, non-proprietary • Investment protection • No fork-lift upgrade • Superior flexibility • HTML <i>and</i> symbolic link support

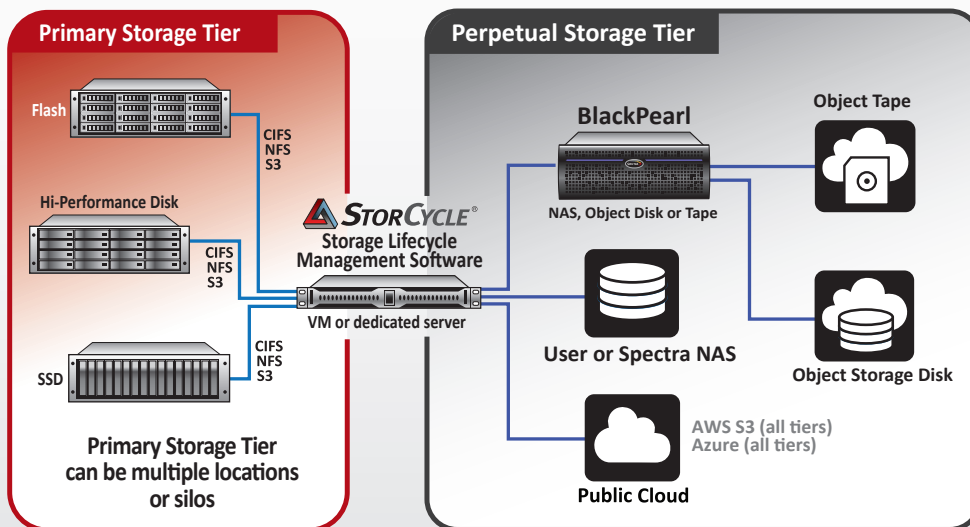

Components Key

 Public Cloud	 Object Tape	 Object Disk
 NAS	 StorCycle Storage Lifecycle Management	

StorCycle Licensing Options

	Administrator Level = Up to 3 Users Work Group Level = Up to 25 Users Data Center Level = Up to 100 Users Enterprise Level = Unlimited Users

Sample workflow featuring StorCycle

With StorCycle organizations can:

- **Reduce storage costs by up to 70%**
- **Minimize** technical staff needed to manage storage
- **Reduce** primary storage capacity by migrating inactive data
- **Maintain** a consistent and familiar access to all migrated assets
